EXPERIENCE

Dokably, San Francisco, CA

Product Designer

Aug 2023 - Present

- Created a user-friendly interface (UX and UI) and responsive design for various web-services: whiteboard, mind map, table constructor, kanban board, AI assistant
- Collaborated with the team, including developers and product managers.
- Ensured the quality and consistency of the design for the successful launch and growth of the startup.
- Marketing materials and landing page design.

AutosportMotors, FL, Remote

Product Designer

Dec 2022 - May 2023

During my time at Autosport Motors, I developed web and mobile platforms for auctioned vehicles.

- Analyzed user behavior for navigation optimization.
- Created an appealing vehicle catalog.
- Introduced paid Carfax reports, attracting new users.

This project boosted inbound traffic, increasing new clients of the main business by 13%. My data-driven UX/UI approach enhanced platform efficiency and user experience.

QR Machine, BY, Remote

Jr. Product Designer

2021 - Dec 2022

Created UX and UI design from concept to execution. Instrumental in crafting designs from inception to deployment for a Generative QR project, including active involvement in crafting compelling visuals for the app store and marketing collateral. Demonstrated expertise in paywall optimization through data analytics, resulting in a notable 28% increase in Monthly Recurring Revenue (MRR).
